

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	19 September 2022
Team ID	PNT2022TMID36071
Project Name	Visualizing and Predicting Heart Diseases with an Interactive Dash Board
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization :

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & Idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes in problem
- 4 hours to collaborate
- 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

10 minutes

- Team gathering:** Invite up to 8 participants to the session and send all invites. Share relevant information or previous ideas.
- Set the goal:** This is about the problem you'll be focusing on solving in the collaborative session.
- Learn how to use the facilitation tools:** Use the Copilot on Superboard to run a highly self-productive session.

Open activity

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

10 minutes

PROBLEM

How might we [your problem statement]?

1. Heart disease is not static it is dynamically change in your by your in prediction is very difficult

2. In this world Heart Diseases is very major problem to prediction no way to get disease in world who in this kind

Key rules of brainstorming:
to make session and productive session

- Stay on topic...
- Choose only wild ideas
- Defer judgement...
- Listen to others...
- Go for volume...
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2 Brainstorm

Write down any ideas that come to mind. But reference your problem statement.

10 minutes

Tip
Use an online platform and allow your whole group to brainstorm together.

Streamline data

- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports

Reduce

- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports

Visualize

- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports

Measure

- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports

Data framework

- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports
- get data from multiple reports

3 Group ideas

Take time grouping your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a working title when it's clear it's bigger than the others notes, try and see if you can break it up into smaller sub-groups.

20 minutes

The heart disease prediction is help for dataset in multiple reports in this reports to check the heart related disease to get data early.

In the dataset to get the person list to find out the heart related problem, someone to get to give the future report.

some of heart disease are was present is affected but not is affected but at the patient in the world so first get the one patient report to get dashboard.

In this kind of access is check the report some minor problem person to get the accurate dataset and to add the dashboard.

In the all separate report to present the heart disease are affected how many persons in our world to predict and we make dashboard.

Step-3: Idea Prioritization

1

Prioritize

You team should all be on the same page about what's important, moving forward. Place yourselves on this grid to determine what ideas are important and which are feasible.
